Attorney Docket No. P03366

RESPONSE TO NOTIFICATION OF NON-COMPLIANT APPEAL BRIEF

HONORABLE COMMISSIONER OF PATENTS

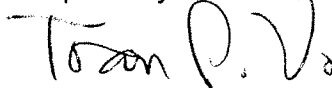

P.O. Box 1450

Alexandria, VA 22313-1450

Sir:

In response to the Notification of Non-Compliant Appeal Brief dated August 19, 2008 in which the Office suggested that the claim appendix should start on a separate page, Appellants are submitting the claims in an appendix starting on a separate page, as suggested. Only the claim appendix is being submitted because the Notification indicates that only this section need be submitted in response thereto.

Respectfully submitted,

Toan P. Vo, Ph.D.
Attorney for the Appellants

VIII. Claim Appendix

The Claims on Appeal:

Claim 4 (Previously Presented): The method of claim 20, wherein said one or more cationic polysaccharides are selected from the group consisting of polyquarternium-10.

Claim 7 (Previously Presented): The method of claim 21, wherein said one or more cationic polysaccharides are selected from the group consisting of polyquarternium-10.

Claim 9 (Previously Presented): The method of claim 20 or 21 wherein said solution includes one or more buffers or buffering systems.

Claim 10 (Previously Presented): The method of claim 20 or 21 wherein said solution includes one or more tonicity agents.

Claim 11 (Previously Presented): The method of claim 20 or 21 wherein said solution includes one or more surfactants.

Claim 12 (Previously Presented): The method of claim 20 or 21 wherein said solution includes one or more viscosity agents.

Claim 20 (Previously Presented): A method of imparting a preservative efficacy to a contact lens solution, the method comprising:

providing in said contact lens solution a preserving agent that comprises one or more saccharides selected from the group consisting of glucose and α -methyl gluco-pyranoside in their D or L forms in combination with one or more polyquaternium-10 cationic polysaccharides, wherein the saccharides and cationic polysaccharides are in amounts effective for solution preservation.

Claim 21 (Previously Presented): A method of imparting a preservative efficacy to a solution that is usable for treating a medical device, the method comprising:

providing in said solution a preserving agent that comprises one or more saccharides selected from the group consisting of glucose and α -methyl gluco-pyranoside in

Serial No. 10/725,159

their D or L forms in combination with one or more polyquaternium-10 cationic polysaccharides, wherein the saccharides and cationic polysaccharides are in amounts effective for solution preservation.
